In the realm of education, the concept of privilege has emerged as a topic of paramount importance. Privilege, often invisible to those who possess it, pervades all aspects of our society, including the classroom. As educators, it is imperative that we critically examine our own privilege and its potential impact on our teaching practices. This book, written from the perspective of a white, cisgender, heterosexual male educator working in a diverse school district, offers a deeply personal and thought-provoking exploration of the complex and uncomfortable topic of privilege in second language education.

## Personal Reflections

The book begins with a series of personal reflections that explore the author's own experiences with privilege. He shares stories from his childhood, his adolescence, and his professional life, each of which

provides a unique lens through which to examine privilege. Through these reflections, the author challenges readers to confront their own assumptions and biases and to consider how these factors might be shaping their interactions with students, colleagues, and the community.

## **Theoretical Analysis**

In addition to personal reflections, the book also provides a thorough theoretical analysis of privilege. The author draws on the work of critical race theory, feminist theory, and queer theory to explore the ways in which privilege operates both individually and institutionally. This analysis provides a deeper understanding of the complex and multifaceted nature of privilege and its implications for education.

## **Practical Examples**

The book concludes with a series of practical examples that illustrate how educators can interrogate privilege in their own classrooms. The author shares specific strategies for creating more inclusive and equitable learning environments. These strategies are grounded in research and theory and are designed to help educators challenge their own assumptions, create more inclusive learning materials, and facilitate respectful classroom discussions about diversity and social justice.

*Interrogating Privilege: Reflections of a Second Language Educator* is an essential resource for any educator who is committed to creating a more just and equitable classroom. The book's personal reflections, theoretical analysis, and practical examples provide a powerful framework for understanding and addressing privilege in second language education. By interrogating our own privilege, we can become more effective educators

and create more inclusive and equitable learning environments for all students.
