- (B) To elaborate on the religious origins of the weathervane
- (C) To contrast their meaning with that of early American weathervanes
- (D) To explain how they were different from Greek weathervanes

Paragraph 3 is marked with an arrow like this.

#### American Weathervanes

Centuries before the daily forecast, people had different ways of predicting the weather. One such method was to observe the direction of the wind, which required the use of a tool called a weathervane. These practical devices were not only employed by farmers and sailors, whose lives or livelihoods depended on their knowledge of dangerous weather conditions, but were also used by churches, businesses, and ordinary people. Over time, the weathervane evolved to take on additional meanings aside from its practicality.

Styles abound, but all weathervanes display a similar structure. A fixed rod comprises the lower portion. Frequently, there are directional arms branching out from the center of the rod to indicate the four directions; the letters "N," "E," "S," and "W" are often attached to the appropriate arms. Above the rod is the ornament, which is the component that rotates with the wind. In order to operate correctly, the ornament must be equal in weight but unequal in surface area on either side of its central axis. Once this mechanical rule is met, a weathervane crafter is free to apply any design he or she chooses.

The history of the weathervane stretches all the way back to ancient Greece. They were also prevalent in medieval Europe among the wealthy, when peasants frequently possessed some sort of religious significance. But by the time the American colonists started producing weathervanes, things had changed: ornaments made in America were
